

Siemens 7VK1440

The implementation is based on the 7VK512 manual. No documentation is currently available regarding the 7VK1440.

The model reproduces a reclosing relay with a RAR and A DAR up to 9 reclosing attempts and RAR different dead times for 3ph faults and single ph fault

The relay reclosing part is mostly fully supported.

Not supported features:

- Synchronism and voltage check.

- Single trip if not directly supported by the protective device associated to the LFAA recloser
